

Isaac Olalekan Ajibola

Full-Stack Software Engineer

Email: olalekanisaac75@gmail.com | Portfolio: bigzic.github.io | LinkedIn: linkedin.com/in/isaac-ajibola

PROFESSIONAL SUMMARY

Project-based Full-Stack Software Engineer with proven delivery across e-commerce, booking, and event platforms from architecture to deployment. I build secure, scalable web systems with strong backend engineering, payment integration, and automation focus. I have delivered production-ready solutions on tight timelines, including platforms that support real transactions, customer workflows, and operational efficiency.

KEY COMPETENCIES

- Backend Engineering: Node.js, Express.js, Python, C#, REST API design
- Frontend Engineering: React, Next.js, TypeScript, Redux, Tailwind CSS
- Databases & Caching: MongoDB, MySQL, Redis, SQL performance optimization
- Payments & Integrations: Paystack, email systems, verification workflows
- Platform Delivery: Authentication, CMS/admin tools, booking and ticketing systems
- Quality & Collaboration: Unit testing, agile delivery, cross-functional teamwork

SELECTED PROJECTS AND DELIVERY EXPERIENCE

BB Glow'd Natural E-commerce Platform

Full-Stack

- Developed a full MERN + Next.js e-commerce application for a beauty brand.
- Built a responsive frontend with Next.js, TypeScript, React, Redux, and Tailwind CSS.
- Delivered a custom CMS admin panel for product and order management.
- Integrated Paystack payments and secure authentication with email verification.
- Result: Launched a production-ready digital sales platform with improved online order handling.

The Link Hangouts Event Ticketing and Commerce System

Full-Stack

- Built an end-to-end event management and ticketing platform with e-commerce capabilities.
- Implemented event creation, real-time availability tracking, ticket booking, and QR code generation.
- Integrated secure checkout, order tracking, and inventory-aware shopping workflows.
- Implemented Paystack payments, user authentication, and automated email notifications.
- Result: Delivered a unified platform that supports both event operations and merchandise sales.

Tohanniees Skincare E-commerce and Marketing Automation

Full-Stack

- Developed secure backend services with Express.js and MongoDB for API and payment workflows.
- Built and integrated an email automation system for marketing and transactional communication.
- Delivered campaigns and notifications to over 700 customers/subscribers.
- Optimized the application for performance, scalability, and reliable delivery under tight timelines.
- Result: Enabled smoother customer purchase flow and stronger digital marketing operations.

Tohanniees Beauty Booking Platform

Full-Stack

- Built a customer booking application with real-time availability and appointment management.
- Implemented scheduling workflows, confirmation emails, reminders, and rescheduling support.
- Designed a streamlined and mobile-friendly booking experience for service customers.
- Result: Improved service scheduling efficiency and customer self-service booking.

Noks Technologies Web Applications and API Delivery

- Built and maintained web applications using C#, React, jQuery, and SQL.
- Developed RESTful APIs with .NET and wrote efficient SQL queries for data operations.
- Result: Supported dependable internal application functionality and data handling workflows.

ALX Africa Backend Engineering Internship

- Developed and maintained backend systems using Python and JavaScript.
- Implemented caching and queuing to improve performance and scalability.
- Created unit tests and collaborated in team-based software delivery.
- Result: Strengthened engineering fundamentals in scalable backend architecture and quality practices.

EDUCATION

ALX Africa

- Training focus: Full-stack web development, AWS system administration, computer programming
- Certificate: savanna.alxafrica.com/certificates/hel9spxfjy
